Zerust® AxxaVis™ PX-05-AN

Zerust®/Excor® AxxaVis™ PX-05-AN is a powder, that when added to rinse water, enables it to neutralize acids left by cleaning processes. Use as a final rinse to control flash corrosion on metals caused by acidic cleaning treatments, such as acid pickling and Zerust AxxaClean™ rust removal products.

Add AxxaVis PX-05-AN to water used as a rinse after cleaning metals with Zerust AxxaClean rust removers or acid pickling. A solution of AxxaVis PX-05-AN reduces flash corrosion caused by issues from acids, especially on highly reactive surfaces such as cast iron.

To use, dilute AxxaVis PX-05-AN in deionized water. When using tap sources, pretreat water with Zerust AxxaVis PX-10-HRD. Spray or dip freshly cleaned parts in the AxxaVis PX-05-AN water solution and rapidly dry. Place items into Zerust/Excor VCI corrosion inhibitor packaging or rust preventatives for shipping or storage.

Dosage Instructions

Water*	AxxaVis PX-05-AN
1L of purified water	Add depending on application Typically 10 -100 g/L or 1-10% by weight

*For water with a hardness above 100 ppm, pre-treat with Zerust AxxaVis PX-10-HRD.

Application Example

Highly reactive cast iron parts recently cleaned by an acidic rust remover were rinsed with a solution of AxxaVis PX-05-AN. Items were then placed in packaging using Zerust VCI Kraft paper.

Benefits

- Controls flash corrosion
- Neutralizes acids
- Use as a spray or immersion
- Safe and non-hazardous*

Availability

Part Number:
460-F-00005 25 lb case

Product Info

- *Safe to use and handle. Product is not hazardous for people or the environment according to EU (CLP) or OSHA HazCom 2012 (US GHS).
- For use with ferrous metals. Multimetal compatible. Not recommended for extended exposure to aluminum.
